Bourns OSP Products Group Adds New Versatile Surge Protector Test Set

Riverside, California - February 6, 2013 - Bourns Outside Plant Products Group is pleased to announce the release of the [Models 4030-01 and 4030-02 Surge Protector Test Sets](#). The test sets may be used to test components and surge protection modules. The Model 4030-0x is assembled in a rugged case with a handle and has a convenient test socket for 5-pin surge protectors.

The Bourns® Model 4030-0x may be used as a handheld portable unit or Model 4030-xx-W may be mounted in the Central Office (CO) with DIN rail mounting and includes an AC power supply adapter.

Features

- New rugged plastic case with handle
- 5-pin test socket built-in (1-pin to 5-pin and 4-pin to 5-pin adapters available)
- Three banana jacks for testing non 5-pin modules (2-pole and 3-pole component adapters available)
- Three 24-inch long test leads (two red and one black), 48-inch long test leads also available (optional)
- Capable of measuring 5-pin module series resistance (up to 150 ohms)
- Durable tactile membrane switches
- Power options:
 - Standard 9 volt alkaline batteries included (lithium batteries for longer life may be substituted, but need to be installed by user)
 - 120 volt AC adapter available as an option
- Wall mount model (4030-xx-W) available:
 - DIN rail strip can be wall or frame mounted (DIN rail strip mounting screws are not included)

Applications

Suitable for testing:

- Gas tubes
- Carbon gaps
- MOVs
- Zener and avalanche diodes
- Thyristor devices
- Finished surge protection products
