Models H-22 & H-23 Turns-Counting Dial Improvements

Bourns Sensors and Controls Division is announcing two improvements to the [H-22](#) and [H-23](#) Turns-Counting Dials. The brake has been improved to provide increased positive resistance or higher torque. The knurled feature of the knob is also being changed to a new contoured grip as shown in the photos below:

In addition to the product improvements, this product will now be produced in China. These changes do not affect form, fit, function or RoHS compliance of the models.

These changes will be in effect for orders and shipments on or after September 1, 2006.
