

Product Change Notification

MULTIFUSE® PPTC RESETTABLE FUSES

July, 2012

Bourns® Model MF-SD013/250-2 Changes

Bourns® Multifuse® PPTC Product Line is moving the final assembly of the [Model MF-SD013/250-2](#) from its current location to an in-house process at Bourns (Xiamen) Ltd.'s manufacturing facility.

With the move, the marking on the housing will change from a white ink to a laser marking, and the solder material will change from a Pb/Sn/Sb alloy to a Sn/Sb alloy. Additionally, the Time to Trip specification will change from 1 A/2 sec. to 1 A/2.5 sec.

This Product Change Notification reflects changes in the manufacturing location, marking, materials and functionality.

The last time buy date for the unchanged parts is August 1, 2012.

Please contact your [local Bourns, Inc. or Bourns AG representative](#) with any questions or refer to our website at www.bourns.com.
